

## 2022

Songlin Yang's paper, entitled "Enhanced room-temperature magnetoresistance of hybrid graphene nanosheets produced by a laser-assisted process", has been published in *Journal of Materials Research*, **57**, 5885–5893 (2022)

Welcome Howyn Tang and Hossein Pouri to our group!

Etienne Joulin's video is an illuminating dive into his summer research pursuits! Titled "[Specialized Nanoparticles for Brain Treatment: An Animation](#)" (available on youtube.com), it's a commendable effort. Kudos, Etienne!

Yingqi Zhang successfully defended her PhD thesis. Congratulations, Yingqi!

Welcome the summer student, Etienne Joulin, who earned Western Engineering Undergraduate Summer Research Award. Congratulations, Etienne!

Yingqi's paper titled "Carbon Nanostructure-Based DNA Sensor for Rapid Detection of Breast Cancer-Associated Genes" has been published in *Nanoscale Research Letters* (2022) 17:93. Congratulations, Yingqi!
