

**SHORT COURSE AND WORKSHOP ON
Design of Machine Foundations**

May 18 & 19, 2017

Instructor: Prof. M. Hesham El Naggar, PhD, P. Eng., FEIC

Geotechnical Research Centre
1151 Richmond Street North
Faculty of Engineering, Western University
London, ON N6A 5B9
E-mail: cquintus@uwo.ca
Tel: 519.661.3344 Fax: 519.661.3942

The course will be held at the
Holiday Inn Calgary
4206 MacLeod Trail South
Calgary, AB T2G 2R7
(located by 39th Avenue light rail transit station)
(Kananaskis Room)

Registration Fee: \$1,000 plus GST (5%)

Includes: Breakfast, coffee breaks and hot lunch buffet.

This short course and workshop should be of interest to geotechnical engineers and civil engineers who wish to have a better understanding of the current state-of-the-art with respect to the analysis and design of flexible, rigid and pile foundations subjected to all types of dynamic loads. All key concepts and terminology will be explained and emphasis will be placed on the practical application of the information provided.
