SE 2250 - Software Construction

This course is intended to give an in depth look at the implementation and test phases of the software construction process.

SE 3316 - Web Technologies

This course covers the technologies, protocols and architectures of the Internet.

SE 4452 - Software Verification and Validation

The course focuses on software verification throughout the software life cycle, including reviews, inspections, testing techniques (functional and structural), levels of testing (unit, integration, system, and acceptance), and testing tools (static and dynamic)
