Description

Topics covered in this course include; analysis and behaviour of steel structures and industrial buildings, design of steel structures, understand the concepts of structure stability and lateral torsional buckling of steel beams, design of crane-supporting steel structures, plate girders, and steel connections.

The general objectives of this course are for student to become able to:

- Understand the three-dimensional modeling aspects and techniques of steel industrial buildings
- Understand and quantify the concept of structure stability and buckling of columns
- Understand the stability concepts of beam-columns
- Understand the lateral torsional buckling of steel beams
- Design steel plate girders with the provisions of CSA Standard CAN/CSA-S16-14
- Design crane-supporting steel structure with the provisions of CSA Standard CAN/CSA-S16-14
- Understand the behaviour of Steel Connections.

Prerequisites:

Bachelor’s degree in Civil Engineering

Note: It is the student's responsibility to ensure that all Prerequisite and Corequisite conditions are met or that special permission to waive these requirements has been granted by the Faculty. It is also the student's responsibility to ensure that they have not taken a course listed as an Antirequisite. The student may be dropped from the course or not given credit for the course towards their degree if they violate the Prerequisite, Corequisite or Antirequisite conditions.
### Topics

</table>
Remote Proctored Quizzes (two)  
(Open Book) | Topics 1-3 and topics 4-7 | Friday June 04, 2021 and Friday July 02 | 30%

Final Project I  
Report and Presentation (Group – Max. 4 Students/group) | Report and Presentation of State-of-the-Art | July 05, 2021 | 20%

Final Project II  
Building Analyses and Design (Group – Max. 4 Students/group) | Building Analyses and Design for whole course materials | July 09, 2021 | 30%

Note: Students who have failed this course previously must repeat all components of the course. No special permissions will be granted enabling a student to retain laboratory, assignment or test marks from previous years. Previously completed assignments and laboratories cannot be resubmitted.

Project I Breakdown

- Presentation and Oral Discussion 60%
- Report 40%

Project II Breakdown

Final Project Portfolio:
- Cover Letter 05%
- Design Brief 10%
- Calculations 25%
- Drawings 20%
- Oral discussion & Defence of design 40%

Project I - Max. 4 Students/group

Presentation
Each group will give a 15 minutes presentation on their project followed by an oral discussion and defence of the report topic. Each student is required to be fully aware of all aspects of the report and **participate equally in presenting**. Some of the questions shall be asked individually to any of the group members, and others to the whole group.

Report
The length of the Project I report shall not exceed 20 typed pages (font size 12, double spaced, including all figures, references, title page, etc.). The evaluation of the final report shall be based on the format, layout, completeness, technical content and use of English.

**Project II - Max. 4 Students/group**

**Oral discussion and Defence of design**
Each group will give a 5 to 10 minutes presentation on their project followed by an oral discussion and defence of the design. Each student is required to be fully aware of all aspects of the final project, such as analyses, design, and drawings. Some of the questions shall be asked individually to any of the group members, and others to the whole group. Each individual member of the group might receive different mark based on the oral discussion.

**Final Project Portfolio**

**Cover letter and Design Brief**
The length of the cover letter is one page and follow the common layout of cover letters directed to the Department of Civil and Environmental Engineering at Western University. The length of the final design brief shall not exceed 10 typed pages (font size 12, double spaced). Design Brief Contents are: Cover Letter, Executive Summary; Introduction, Design Criteria and Codes of Analyses, particulars of design/analysis, lateral deflections results, and Recommendations (or Conclusions). The Design Criteria would include the design standards and technical references used; the particular design criteria adopted also must be indicated succinctly. The particulars of design/analysis would summarize the rationale behind the various design decisions. The evaluation of the final design brief shall be based on the format, layout, completeness, technical content and use of English.

**Calculations**
Calculations must be well organized, clear, complete, and done on calculation paper. Each calculation page shall be dated, and shall indicate the name or initials of the person who performed the calculations. A final calculation set, which must be current, checked and indexed, shall be submitted with the final design brief. The evaluation of calculations will be based on their clarity, completeness, technical content, originality, and accuracy.

**Drawings**
Each student is required to prepare a set of drawings. Each drawing shall be dated and shall indicate the name or initials of the person who did the drawing. The drawings shall be developed using AutoCAD or similar drafting software. ETABS drafting tool is not allowed to be used. The evaluation of drawings will be based on their technical content, clarity, completeness, and quality of drafting.

**Quizzes and Examination:**
Two One-hour quizzes will be held during tutorial hours. These quizzes are tentatively scheduled for 9:00 am on Friday, June 04, 2021 and Friday, July 02, 2021.
The Two One-hour quizzes will be conducted using Zoom. You will be required to keep your camera on for the entire session, hold up your student card for identification purposes, and share your screen with the invigilator if asked to do so at any time during the exam. The exam session will not be recorded.*

More information about the use of Zoom for exam invigilation is available in the Online Proctoring Guidelines at the following link:

Completion of this course will require you to have a reliable internet connection and a device that meets the system requirements for Zoom. Information about the system requirements are available at the following link:

https://support.zoom.us/hc/en-us.

* Please note that Zoom servers are located outside Canada. If you would prefer to use only your first name or a nickname to login to Zoom, please discuss this with your instructor in advance of the test or examination.

Quizzes will be held during these tentative dates shown above with a random sample of students to do an oral component of exam via Zoom (or similar alternatives). The quizzes grade based on written responses might be adjusted according to the oral exam outcome.

Some fraction of students may be selected for a follow-up virtual meeting while having their webcam on (10-15 mins meeting). The students chosen for this meeting may be assigned randomly. The students chosen may also be those whose answers raise any suspicion that they are not the authentic and unique responses of that individual. During the virtual meeting it is expected that: i) students should be prepared to answer exam related questions. ii) students should be ready to attempt solving any course related problems according to instructor’s discretion. Should an instructor decide to initiate follow-up discussion, all selected students will be informed within one week after the exam. If a student is selected for a follow-up discussion, that discussion will constitute a mandatory component of the final exam and the instructor may change the final exam mark based on the outcome of the discussion.

Note: Emails requesting a follow-up virtual meeting will be sent to the selected students only once. It is the students’ responsibility to check Western email daily for at least one week after the quiz/final exam date. A student who ignores the course instructor’s call for a meeting or doesn’t show up for a follow-up discussion will be considered as a cheating case.

**Assignments:**

Each student must turn in the solution of the assignment at 9:00 am Monday Morning electronically on OWL. Hardcopy submissions are not accepted unless permission is granted by the instructor. Late assignment will be accepted till 5:00 pm on the Tuesday following the
submission date and have to be submitted directly to the instructor. Late assignments will be assessed a penalty of 10% per day, to a maximum of 4 days, after which they will receive a mark of zero. Extensions are to be negotiated with the course instructor, not the teaching assistants.

All required papers, assignments, and projects may be subject to submission for textual similarity review to the commercial plagiarism detection software under license to the University for the detection of plagiarism. All papers submitted for such checking will be included as source documents in the reference database for the purpose of detecting plagiarism of papers subsequently submitted to the system. Use of the service is subject to the licensing agreement, currently between The University of Western Ontario and Turnitin.com (http://www.turnitin.com).

Activities in Which Collaboration is Permitted:

- Project I
- Project II

Activities in Which Collaboration is Permitted:

- Assignments
- Quizzes

Contact Hours:

Dr. Ahmed (Mahdy) Hamada, P.Eng.
etmail: ahamada2@uwo.ca

Contact policy:

- Contact instructor via email (above)
- Weekly Office hours are held via Zoom

Administrative Assistant: Eduard Sviridenko (esviride@uwo.ca)

3 lecture hours per week

Friday: 1:30-4:30 pm (Online)

Lectures will be delivered in live online (via ZOOM) during lecture time slots and recorded. Recorded lectures will be posted afterwards to the course OWL site. Lectures will be organized into learning modules which students should review on a weekly basis. Review of lecture material and self-study should take approximately 4 hours per week.

All of the remote learning sessions for this course will be recorded. The data captured during these recordings may include your image, voice recordings, chat logs and personal identifiers (name displayed on the screen). The recordings will be used for educational purposes related to
this course, including evaluations. The recordings may be disclosed to other individuals participating in the course for their private or group study purposes. Please contact the instructor if you have any concerns related to session recordings.

**Participants in this course are not permitted to record the sessions**, except where recording is an approved accommodation by instructor in **writing**, or the participant has the prior **written** permission of the instructor for this specific course during this specific semester.

**Textbook:**

Prepared class notes should be uploaded to OWL and brought to all lectures and tutorial sessions.

**Optional Course Readings:**

List of books

*Handbook of Steel Construction 2016, Canadian Institute of Steel Construction, 11\textsuperscript{th} Edition, Second revised printing, Canada*

*G. L. Kulak, and G. Y. Grondin 2016, Limit States Design in Structural Steel, Canadian Institute of Steel Construction, 10\textsuperscript{th} Edition, First printing, Canada*

**Course Content:**

The lecture notes and online lecture videos are copyrighted to the instructor and legally protected. Do not post these videos and lecture notes on any other website or online forums. The recording of the live/synchronous sessions of the course without the permission from the instructor is prohibited. The illegal posting and sharing of the copyrighted course content could be subjected to legal actions.

**Units:**

Both SI and FPS unit systems may be used in lectures, tutorials and examinations.

**Computing:**

Final project and assignments involve computer modelling using the commercial program S-Timber, spread sheets, and writing report. The full versions of software are available at the PC labs in the engineering building or through online access as per the Faculty of Engineering-IT procedures (please consult with Faculty of Engineering IT for granting access to these software).

**Use of English:**

In accordance with Senate and Faculty Policy, students may be penalised up to 10% of the marks on all assignments, tests, and examinations for the improper use of English. Additionally, poorly written work with the exception of the final examination may be returned without grading. If
resubmission of the work is permitted, it may be graded with marks deducted for poor English and/or late submission.

**Cheating, Plagiarism, Academic Offences:**

Academic integrity is an essential component of learning activities. Students must have a clear understanding of the course activities in which they are expected to work alone (and what working alone implies) and the activities in which they can collaborate or seek help; see information above under “Assessments” and ask instructor for clarification if needed. Any unauthorized forms of help-seeking or collaboration will be considered an academic offense. University policy states that cheating is an academic offence. If you are caught cheating, there will be no second warning. Students must write their essays and assignments in their own words. Whenever students take an idea or a passage of text from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence. Academic offences are taken seriously and attended by academic penalties which may include expulsion from the program. Students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence (see Western's scholastic discipline regulations for graduate students).

**Attendance:**

Any student who, in the opinion of the instructor, has not engaged sufficiently in class, laboratory, or tutorial periods will be reported to the Dean (after due warning has been given). On the recommendation of the Department concerned, and with the permission of the Dean, the student will be debarred from taking the regular final examination in the course.

**Conduct:**

Students are expected to follow proper etiquette during synchronous and asynchronous activities to maintain an appropriate and respectful academic environment. Any student who, in the opinion of the instructor, is not appropriately participating in the synchronous and asynchronous learning activities and/or is not following the rules and responsibilities associated with the online learning activities, will be reported to the Associate Dean (Graduate) (after due warning has been given). On the recommendation of the Department concerned, and with the permission of the Associate Dean (Graduate), the student could be debarred from completing the assessment activities in the course as appropriate.

**Health/Wellness:**

As part of a successful graduate student experience at Western, we encourage students to make their health and wellness a priority. Western provides several health and wellness related services (remotely accessible) to help you achieve optimum health and engage in healthy living while pursuing your graduate degree. Information regarding health- and wellness-related services available to students may be found at [http://www.health.uwo.ca/](http://www.health.uwo.ca/).
Students seeking help regarding mental health concerns are advised to speak to someone they feel comfortable confiding in, such as their faculty supervisor, their program director (graduate chair), or other relevant administrators in their unit. Campus mental health resources may be found at

http://www.health.uwo.ca/mental_health/resources.html
https://www.uwo.ca/health/psych/index.html

**Sickness:**

Students should immediately consult with the Instructor (for a particular course) or Associate Chair (Graduate) (for a range of courses) if they have problems that could affect their performance. The student should seek advice from the Instructor or Associate Chair (Graduate) regarding how best to deal with the problem. Failure to notify the Instructor or the Associate Chair (Graduate) immediately (or as soon as possible thereafter) will have a negative effect on any appeal. Obtaining appropriate documentation (e.g., a note from the doctor) is valuable when asking for accommodation due to illness.

**Accessibility:**

Please contact the course instructor if you require material in an alternate format or if any other arrangements can make this course more accessible to you. You may also wish to contact Accessible Education at 661-2111 x 82147 or

http://academicsupport.uwo.ca/accessible_education/index.html, for any specific question regarding an accommodation.

**Accommodation:**

Students with disabilities work with Accessible Education (formerly SSD) which provides recommendations for accommodation based on medical documentation or psychological and cognitive testing. The accommodation policy can be found here: Academic Accommodation for Students with Disabilities.

**Academic Consideration for Student Absence**

Students will have up to two (2) opportunities during the regular academic year to use an online portal to self-report an absence during the term, provided the following conditions are met: the absence is no more than 48 hours in duration, and the assessment for which consideration is being sought is worth 30% or less of the student’s final grade. Students are expected to contact their instructors within 24 hours of the end of the period of the self-reported absence, unless noted on the syllabus. Students are not able to use the self-reporting option in the following circumstances:

- for exams scheduled by the Office of the Registrar (e.g., December and April exams)
- absence of a duration greater than 48 hours,
• assessments worth more than 30% of the student’s final grade,
• if a student has already used the self-reporting portal twice during the academic year

If the conditions for a Self-Reported Absence are not met, students will need to provide a Student Medical Certificate if the absence is medical, or provide appropriate documentation if there are compassionate grounds for the absence in question. Students are encouraged to contact their Faculty academic counselling office to obtain more information about the relevant documentation.

Students should also note that individual instructors are not permitted to receive documentation directly from a student, whether in support of an application for consideration on medical grounds, or for other reasons. All documentation required for absences that are not covered by the Self-Reported Absence Policy must be submitted to the Academic Counselling office of a student’s Home Faculty.

For Western University policy on Consideration for Student Absence, see

Policy on Academic Consideration for Student Absences - Undergraduate Students in First Entry Programs

and for the Student Medical Certificate (SMC), see:

http://www.uwo.ca/univsec/pdf/academic_policies/appeals/medicalform.pdf

**Religious Accommodation**

Students should consult the University's list of recognized religious holidays, and should give reasonable notice in writing, prior to the holiday, to the Instructor and an Academic Counsellor if their course requirements will be affected by a religious observance. Additional information is given in the Western Multicultural Calendar.

**Use of Recordings:**

All of the remote learning sessions for this course will be recorded. The data captured during these recordings may include your image, voice recordings, chat logs and personal identifiers (name displayed on the screen). The recordings will be used for educational purposes related to this course, including evaluations. The recordings may be disclosed to other individuals under special circumstances. Please contact the instructor if you have any concerns related to session recordings.

Participants in this course are not permitted to record the sessions, except where recording is an approved accommodation, or the participant has the prior written permission of the instructor.
Notice:

Students are responsible for regularly checking their email, course website (https://owl.uwo.ca) and notices posted outside the Civil and Environmental Engineering Department Office.
