DESCRIPTION
The trend toward sustainable transportation has a significant impact on the design of our roads. However, this shift presents new challenges and requires innovative mobility solutions. This course focuses on emerging topics and issues related to the impact of technology on sustainable transportation. We also address the main engineering challenges to realizing efficient and green transit solutions in urban areas. We examine the technological advances and limitations of intelligent transportation systems (ITS) in active mobility. This course is self-contained, with the basic concepts being explained in the lectures. Students will interact, collaborate, and work on topics relevant to smart infrastructure and active mobility. They will be exposed to the latest relevant research through papers, readings, and presentations. Students will conduct a comprehensive research project on emerging topics such as shared mobility, active transportation and complete streets as part of the course. Guest lecturers will be invited to present in lectures to bring practical experience to the classroom and promote interactive discussions.

ENROLLMENT RESTRICTIONS
Enrollment in this course is restricted to graduate students in Civil Engineering, as well as any student that has obtained permission to enroll in this course from the course instructor as well as the Graduate Chair (or equivalent) from the student's home program.

PREREQUISITE
CEE 4401 Introduction to Transportation or similar

INSTRUCTOR CONTACT INFORMATION
- Course instructor: Dr. Mohamed Zaki
- Email address: mzaki9@uwo.ca
- Office: Spencer Engineering Building (SEB 3083)
- Lecture hours: TBD (Room: TBD)
- Office hours: Weekly office hours will be held either in person or via Zoom
- Administrative Support: Ph.D. and MESc students: ceeresearchgrad@uwo.ca
  MEng students: ceeprofessionalgrad@uwo.ca

COURSE FORMAT
This course will be delivered in-person.

“In the event of a COVID-19 resurgence during the course that necessitates the course delivery moving away from face-to-face interaction, all remaining course content will be delivered entirely online, either synchronously (i.e., at the times indicated in the timetable) or asynchronously (e.g., posted on OWL for students to view at their convenience). The grading scheme will not change. Any remaining assessments
will also be conducted online at the discretion of the course instructor”

**TOPICS**
1. Course Introduction
2. Data Collection for Active Mobility
3. Emerging Topics in Sustainable Mobility

<table>
<thead>

</thead>
<tbody>
<tr>
<td>1</td>
<td>Introduction</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Lesson 1:</strong> Present Course Syllabus, course expectations, and revise the basics of traffic engineering concepts.</td>
<td>Lecture 1: 3-hour class Reading material <em>(TBD)</em></td>
<td>Week 1</td>
</tr>
<tr>
<td></td>
<td><strong>Lesson 2:</strong> Learn basic concepts in active mobility and sustainable transportation including transportation, health and environment. Project description is provided.</td>
<td>Lecture 2: 3-hour class Reading material <em>(TBD)</em> In-class activity</td>
<td>Week 2</td>
</tr>
<tr>
<td>2</td>
<td>Data Collection for Active Mobility</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td><strong>Lesson 3:</strong> Learn about traffic management and operation for pedestrians and cyclists. Learn about safety evaluation methods for active mobility.</td>
<td>Lecture 3: 3-hour class In-class activity Reading material <em>(TBD)</em></td>
<td>Week 3</td>
</tr>
<tr>
<td></td>
<td><strong>Lesson 4:</strong> Learn the fundamentals of data collection and analysis.</td>
<td>Lecture 4: 3-hour class Reading material <em>(TBD)</em> Project Proposal Report (Due)</td>
<td>Week 4</td>
</tr>
<tr>
<td></td>
<td><strong>Lesson 5:</strong> Learn fundamentals of data collection and analysis (Cont’).</td>
<td>Lecture 5: 3-hour class In-class activity Reading material <em>(TBD)</em> Assignment 1 (Due)</td>
<td>Week 5</td>
</tr>
<tr>
<td></td>
<td><strong>Lesson 6:</strong> Learn the fundamentals method for analyzing pedestrian walking behaviour and activity recognition. Case studies will be covered.</td>
<td>Lecture 6: 3-hour class Reading material <em>(TBD)</em> In-class activity Project Update Report (Due)</td>
<td>Week 6</td>
</tr>
<tr>
<td></td>
<td><strong>Lesson 7:</strong> Learn about road infrastructure for cyclists: Counting approaches, modification</td>
<td>Lecture 7: 3-hour class</td>
<td>Week 7</td>
</tr>
<tr>
<td>3</td>
<td>Emerging Topics in Sustainable Mobility</td>
<td></td>
<td></td>
</tr>
<tr>
<td>---</td>
<td>----------------------------------------</td>
<td></td>

<tr>
<td><strong>Lesson 8:</strong> Learn about the future of commuting and alternative modes of transportation.</td>
<td>Lectures 8: 3-hour class reading material (TBD) Quiz</td>
<td>Week 8</td>
<td></td>
</tr>
<tr>
<td><strong>Lesson 9:</strong> Infrastructure in smart cities: the case of complete streets - definitions, comparative analysis and case studies.</td>
<td>Lectures 9: 3-hour class In-Class Activity reading material (TBD) Assignment 3 (Due)</td>
<td>Week 9</td>
<td></td>
</tr>
<tr>
<td><strong>Lesson 10:</strong> Learn concepts of the electric mobility paradigm. Lecture will include a guest speaker.</td>
<td>Lectures 10: 3-hour class reading material (TBD) Assignment 4 (Due)</td>
<td>Week 10</td>
<td></td>
</tr>
<tr>
<td><strong>Lesson 11:</strong> Learn approaches to City’s Open data and urban mobility research. Case studies from North America will be discussed.</td>
<td>Lectures 11: 3-hour class reading material (TBD) In-Class Activity</td>
<td>Week 11</td>
<td></td>
</tr>
<tr>
<td><strong>Lesson 12:</strong> Course Review and Open Discussion on improving sustainable transportation in Southwest Ontario</td>
<td>Lectures 12: 3-hour class Final Project Report (Due)</td>
<td>Week 12</td>
<td></td>
</tr>
</tbody>
</table>

**Attention:**
- Dates and deadlines for presentations and submissions will be confirmed during the class
- There will be no class during the fall reading week
- Invited speaker's information will be announced as soon as finalized
- No lectures during reading week (October 30, 2023 to November 05, 2023)
# SPECIFIC LEARNING OUTCOMES

<table>
<thead>
<tr>
<th>Degree Level Expectation</th>
<th>Weight</th>
<th>Assessment Tools</th>
<th>Outcomes</th>
</tr>
</thead>
</table>
| Depth and breadth of knowledge | 30% | - Assignments  
- Quiz  
- Project | - Understanding of advanced concepts and theories  
- Awareness of important current problems in the field of study  
- Understanding of computational and/or empirical methodologies to solve related problems |
| Research & scholarship | 15% | - Paper Reviews  
- Project | - Ability to conduct critical evaluation of current advancements in the field of specialization  
- Ability to conduct coherent and thorough analyses of complex problems using established techniques/principles and judgment |
| Application of knowledge | 20% | - Assignments  
- Project  
- Quiz | - Ability to apply knowledge in a rational way to analyze a particular problem  
- Ability to use coherent approach to design a particular engineering system using existing design tools |
| Professional capacity / autonomy | 10% | - Project | - Awareness of academic integrity  
- Ability to implement established procedures and practices in the coursework  
- Defends own ideas and conclusions  
- Integrates reflection into his/her learning process |
| Communication skills | 15% | - Paper reviews  
- Project | - Ability to communicate (oral and/or written) ideas, issues, results and conclusions clearly and effectively |
### Awareness of limits of knowledge

<table>
<thead>
<tr>
<th>Awareness of limits of knowledge</th>
<th>10%</th>
<th>- Project</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td>- Awareness of the need of assumptions in complex scientific analyses and their consequences</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Understanding of the difference between theoretical and empirical approaches</td>
</tr>
<tr>
<td></td>
<td></td>
<td>- Ability to acknowledge analytical limitation due to complexity of practical problems</td>
</tr>
</tbody>
</table>

### COURSE MATERIAL

Prepared class notes will be made available through the course website on OWL at [http://owl.uwo.ca/](http://owl.uwo.ca/), along with other useful reference material and data for assignments.

Lecture notes and any posted demonstration videos are copyrighted to the instructor and legally protected. Do not post these videos and lecture notes on any other website or online forums. The recording of the live/synchronous lectures of the course without the permission from the course instructor is prohibited. The illegal posting and sharing of the copyrighted course content could be subjected to legal actions.

### REFERENCES

No specific textbook will be needed. Course notes and handouts are the primary references used in this course. Resources will be posted on the course webpage. Other references are listed below:

- University Course on Bicycle and Pedestrian Transportation, February 2006 - FHWA-HRT-06-065 (available online)

Additionally, lecture notes, Journal papers and other reading material will be distributed to the students.

### COMPUTING

This course requires internet access and access to specific open source software. Installation instructions for the software packages used in the project will be provided as part of the course materials and via OWL.

Terms of use: Free student downloads are for educational use only and may only be used for self-learning, student instruction, student projects, and student demonstrations.
Homework Assignments

The assignments will be posted on the course OWL site with the due date and time indicated. Late homework will not be accepted. Each assignment must be submitted as a single PDF file through OWL. In case of programming assignments, the code files will also be uploaded. Except when explicitly specified, all assignments are to be completed individually. Students must write and program their own work. Copying homework from another student/group, or other sources is a violation of academic integrity (see below).

Final Project and Presentation

Students can choose to work individually or in a group of 2 on a project relevant to the material taught in the class. Related software tools and data sets will be provided. A project grade will be divided between a proposal report, progress report, individual contribution and a final paper and presentation. Each group will work closely with the instructor in defining the project scope. Students are encouraged to come up with their own idea for the project. A presentation summarizing the efforts and the results will be scheduled along with the final project report submission.

Instructions, formatting and rubric will posted online through OWL. The breakdown of grades for the Final Project and Presentation is as follows:

<table>
<thead>
<tr>
<th>Item</th>
<th>Breakdown</th>
</tr>
</thead>
<tbody>
<tr>
<td>Project proposal</td>
<td>5%</td>
</tr>
<tr>
<td>Project update report</td>
<td>5%</td>
</tr>
<tr>
<td>Project Journal Logs. If 2 members per group, minutes will be included</td>
<td>5%</td>
</tr>
<tr>
<td>End of Semester Presentation</td>
<td>10%</td>
</tr>
<tr>
<td>End of Semester Report</td>
<td>15%</td>
</tr>
<tr>
<td>Total</td>
<td>40%</td>
</tr>
</tbody>
</table>

Research Paper Review and Presentation

Short paper critique and presentations covering some of main modules of the course will be required. The instructor will distribute papers directly to students for review and critique. The instructions and rubric will be posted on OWL. Due dates for the research paper review and presentation will be announced in the first
week of class. No late homework will be accepted. All assignments should be done neatly and professionally.

**Quiz**

The quiz will be open book and will comprise a combination of design questions, data-set, and short-answer questions. In the case the quiz is rescheduled, there will be an announcement at least eight days in advance of the new date. In the case of unexpected events that delay a quiz (e.g., COVID Lockdown, widespread power outage), the next available date will be selected.

**Activities in which collaboration is permitted:**

- **Participation using course OWL site “Forums”**: Weekly forums will be posted on the course OWL site. Each week students are expected to interact with the course content and with each other by posting questions/responding to existing questions on OWL “Forums”. Minimum expectation regarding this participation activity is at least one posting per week. Group discussion using “Forums” regarding course material and topics covered in lectures is permitted.

- **Final Project**: Students will be divided into groups (1 or 2 members per group). If students are working in a group of two, collaboration is allowed between group members but not between groups. One final project report is required from each group.

**Activities in which students must work alone (collaboration is not permitted):**

- Homework Assignments
- Quiz
- Research Paper Review and Presentation

**UNITS**

SI units will be used in lectures and examinations

**USE OF ENGLISH**

In accordance with Senate and Faculty Policy, students may be penalized up to 10% of the marks on all assignments, tests, and examinations for the improper use of English. Additionally, poorly written work with the exception of the final examination may be returned without grading. If resubmission of the work is permitted, it may be graded with marks deducted for poor English and/or late submission.

**CHEATING, PLAGIARISM/ACADEMIC OFFENCES**

Academic integrity is an essential component of learning activities. Students must have a clear understanding of the course activities in which they are expected to work alone (and what working alone implies) and the activities in which they can collaborate or seek help; see information above and ask instructor for clarification if needed. Any unauthorized forms of help-seeking or collaboration will be considered an academic offense. University policy states that cheating is an academic offence. If you are caught cheating, there will be no second warning. Students must write their essays and assignments in their own words. Whenever students take an idea or a passage of text from another author, they must acknowledge their debt both by using quotation marks where appropriate and by proper referencing such as footnotes or citations. Plagiarism is a major academic offence. Academic offences are taken seriously and attended by academic penalties which may include expulsion from the program. Students are directed to read the appropriate policy, specifically, the definition of what constitutes a Scholastic Offence at the following website:
CONDUCT
Students are expected to follow proper etiquette to maintain an appropriate and respectful academic environment. Any student who, in the opinion of the instructor, is not appropriately participating in course activities and/or is not following the rules and responsibilities associated with the course activities, will be reported to the Associate Dean (Graduate) (after due warning has been given). On the recommendation of the Department concerned, and with the permission of the Associate Dean (Graduate), the student could be debarred from completing the assessment activities in the course as appropriate.

HEALTH/WELLNESS SERVICES
As part of a successful graduate student experience at Western, we encourage students to make their health and wellness a priority. Western provides several health and wellness related services to help you achieve optimum health and engage in healthy living while pursuing your graduate degree. Information regarding health- and wellness-related services available to students may be found at http://www.health.uwo.ca/.

Students seeking help regarding mental health concerns are advised to speak to someone they feel comfortable confiding in, such as their faculty supervisor, their program director (graduate chair), or other relevant administrators in their unit. Faculty of Engineering has a Student Wellness Counsellor. Information on how to schedule an appointment with the councilor is available at: https://www.eng.uwo.ca/undergraduate/academic-support-and-accommodations/Student-Wellness-Counselling.html

Students who are in emotional/mental distress should refer to Mental Health@Western: http://www.uwo.ca/uwocom/mentalhealth/ for a complete list of options about how to obtain help.

SICKNESS
Students should immediately consult with the instructor (for a particular course) or Associate Chair (Graduate) (for a range of courses) if they have problems that could affect their performance. The student should seek advice from the Instructor or Associate Chair (Graduate) regarding how best to deal with the problem. Failure to notify the Instructor or the Associate Chair (Graduate) immediately (or as soon as possible thereafter) will have a negative effect on any appeal. Obtaining appropriate documentation (e.g., a note from the doctor) is valuable when asking for accommodation due to illness.

Students who are not able to meet certain academic responsibilities due to medical, compassionate, or other legitimate reason(s), could request for academic consideration. The Graduate Academic Accommodation Policy and Procedure details are available at: https://www.eng.uwo.ca/graduate/current-students/academic-support-and-accommodations/index.html

ACCESSIBLE EDUCATION WESTERN (AEW)
Western is committed to achieving barrier-free accessibility for all its members, including graduate students. As part of this commitment, Western provides a variety of services devoted to promoting, advocating, and accommodating persons with disabilities in their respective graduate program. Graduate students with disabilities (for example, chronic illnesses, mental health conditions, mobility impairments) are strongly encouraged to register with Accessible Education Western (AEW):
AEW is a confidential service designed to support graduate and undergraduate students through their academic program. With the appropriate documentation, the student will work with both AEW and their graduate programs (normally their Graduate Chair and/or Course instructor) to ensure that appropriate academic accommodations to program requirements are arranged. These accommodations include individual counselling, alternative formatted literature, accessible campus transportation, learning strategy instruction, writing exams and assistive technology instruction.
