Master of Engineering (M.Eng.) Program in HVAC Systems

The Department of Mechanical & Materials Engineering (MME) at the University of Western Ontario offers a professional Master of Engineering (M.Eng.) program in Heating, Ventilating and Air Conditioning (HVAC) Systems. This program is specially structured to assist qualified engineers in the advancement of their professional careers by specializing in the HVAC Systems. Department also has an HVAC Resource Laboratory equipped with an educational Air Handling Unit and computer work stations with HVAC modeling software HAP.

Students start this program on September 1st. Alternate start date requires the approval of the MME Associate Chair Graduate. If enrolled full-time, a student can complete the degree in one year.

For admission consideration to the M.Eng program, students must have a Bachelor's degree in Mechanical Engineering, or an equivalent degree from an accredited University with a minimum of 70% (B) grade average (North American), computed based on the last two years of a bachelor's honours degree marks, or on their previous graduate marks. In some cases, students with a similar degree from another scientific discipline may be admitted, with the approval of the MME Associate Chair Graduate. Please note that this is a very competitive program, meeting the minimum requirements for admission does not guarantee acceptance into the program.

The program is comprised of either 10 half courses, or 8 half courses plus an MEng Project (MME 9600) as follows:

A) 4 mandatory core half courses related to HVAC.
   - MME 9516a HVAC I
   - MME 9517b HVAC II
   - MME 9641b Thermal Systems Engineering
   - CEE 9532b Building Sustainability

B) 2 of the 5 core half courses in Professional Engineering (offered in Summer term).
   - ES 9185L Risk Assessment & Management in Engineering Systems
   - ES 9510L Engineering Planning & Project Mgmt
   - ES 9501L Business & Mgmt: A Global Perspective
   - ES 9010L Intellectual Property for Engineers
   - ES 9670L Engineering Communication

C) 4 elective half courses, or 2 elective half courses with the MEng Project (MME 9600).
   - MME 9515a Fluid Machinery
   - MME 9604a Fluid Mechanics
   - MME 9521a Systems and Control
   - CEE 9518L Building Information Modelling
   - MME 9614a Applied Computational Fluid Mechanics and Heat Transfer

Interested student may also be able to enroll in other 96xx and some 97xx-level courses offered by the MME Department with the approval of the course instructor and the MME Associate Chair Graduate. Please note that MEng students are allowed to take a maximum of 3 MME 95xx-level courses.

Courses may be chosen from Electrical and Computer Engineering, Chemical and Biochemical Engineering, Civil and Environmental Engineering, Applied Math, and Physics and Astronomy with the approval of the MME Associate Chair Graduate.
