

MME 3348A – Manufacturing Processes

COURSE OUTLINE – Fall 2026

***CALENDAR
DESCRIPTION:***

This course introduces modern industrial processes in the manufacturing of various engineering products. It studies the relationships between materials properties, manufacturing processes, and the performances of the finished components. The course combines theoretical principles with practical applications to equip students with the skills to address contemporary challenges in manufacturing industries.

***COURSE
INFORMATION:***

Instructor: HaoTian Harvey Shi, Ph.D., P.Eng.
Email: harvey.shi@uwo.ca
Lectures: See <https://draftmyschedule.uwo.ca/> for details
Tutorials/Labs: See <https://draftmyschedule.uwo.ca/> for details

PREREQUISITES:

ES 1021A/B, MME 2202A/B or CEE 2202A/B, MME 2260A/B
Unless you have either the requisites for this course or written special permission from your Dean to enrol in it, you will be removed from this course and it will be deleted from your record. This decision may not be appealed. You will receive no adjustment to your fees in the event that you are dropped from a course for failing to have the necessary prerequisites.

ANTIREQUISITES: N/A

***ACCREDITATION
UNITS:***

Engineering Science = 50%, Engineering Design = 50%

TOPICS:

1. Introduction to Manufacturing Processes
2. Materials Properties and Their Selection for Manufacturing
3. Metal-Casting Processes & Technologies
4. Forming & Shaping Processes & Technologies
5. Machining Processes & Tools
6. Joining and Surface Processes
7. Micromanufacturing and Microelectronics
8. Metrology & Quality Assurance
9. Advanced & Green Manufacturing

LEARNING OUTCOMES

Upon successful completion of this course, students will be able to:

1. Understand the various modern processes in manufacturing (KB3)
2. Analyze correlations and tradeoffs for different processes (PA1, I3)
3. Solve governing equations of manufacturing processes for various parameters and configurations (PA1)
4. Develop structure-processing-property relationships (KB3)
5. Use standard reference sources to compare processes (PA1, ET1)
6. Develop formal process selection strategies (PA2)
7. Analyze and interpret data from lab experiments in relation to theoretical/empirical predictions for manufactured parts in a team (IN3, IT1)
8. Generate diverse set of geometries optimized for industrial processes and select the best process based on further analysis (**D2, D3**)
9. Relate process parameters and quality of the final part with metrology (ET1)
10. Integrate considerations of sustainability and environmental impact of manufacturing processes (**IESE2, IESE3**)
11. Understand the role of machinability of materials in the manufacturing of a new product (**KB4**)

The terms in parentheses following each learning outcome refer to Graduate Attributes (GAs) established by the Canadian Engineering Accreditation Board (CEAB) of Engineers Canada. These attributes are used in the accreditation process to ensure that accredited engineering programs are providing the academic requirements for licensure as a professional engineer in Canada. Information on Graduate Attributes and Indicators can be found at [GA Indicators](#). The table below indicates which specific attributes are measured in this course and the level at which it is measured, wherein I=Introduced, D=Developed and A=Advanced/Applied

CEAB Graduate Attribute Learning Levels for this course:

Knowledge Base	D	Engineering Tools	D	Impact on Society	D
Problem Analysis	D	Individual & Teamwork	D	Ethics and Equity	
Investigation		Communication		Economics & Project Mgmt.	D
Design	D	Professionalism		Life-Long Learning	

CONTACT HOURS:

3 lecture hours, 2 tutorial hours, 2 lab activities (3-hour sessions each), half course

TEXTBOOK:

Groover - Fundamentals of Modern Manufacturing: Materials, Processes, and Systems 7th Edition (Required) Available in UWO Bookstore

Approximately Costs:

ebook: 9781119475217 \$134.95 - permanent

ebook: 9781119475217 \$60 - 150 day rental

Print: 9781119722014 \$159.95 (discounted price)

Students are welcome to purchase second-hand or earlier editions of this textbook.

https://bookstore.uwo.ca/textbook-search?campus=UWO&term=W2026A&courses%5B0%5D=001_UW/MME3348A

Kalpajian & Schmid - Manufacturing Engineering & Technology (Reference)

UNITS:

S.I. units will be used exclusively.

EVALUATION:

The final grade is computed as follows:

Evaluation Format	Weight	Assigned	CEAB GAs Assessed
Midterm Examination	20%	TBA	
Lab Work	12%	1-week after your lab session	
Course Project	28%	Details below	
Interim Report	8%	Week of Oct. 19 th	
Final Report & Presentation	20%	Week of Nov. 30 th – Designated Assessment	DES2
Final Examination	40%	Held during December final examination period	DES3, EPM1, IES2, IES3, KB4

COURSE POLICIES:

The following course-specific policies will be enforced throughout the course:

General

- **All lectures will be held in-person**
- Dates and other evaluation details are tentative and may be changed by the instructor. Notification will be sent through Brightspace
- Exams will cover material presented in the textbook, lectures, lecture notes, laboratory sessions, assignments, and tutorials, *as well as application and extension of these topics to new situations*

Midterm Exam

- The midterm exam will be in-person, an aid sheet may be used
- Non-programmable calculators may be used. Computers, smartphones, tablets, etc. are not allowed

Project

- Project is done in groups of 4 students
- Equal contributions expected from all group members (contribution forms to be filled with submission)
- If one student applied for academic consideration, then, the material by the rest of the group shall be submitted by deadline, and final version submitted after academic accommodation ends
- Deliverables will be penalized by 25% of the available marks per day for late submission.

Final examination

- The in-person final exam will be *close-book*, *an aid sheet may be provided*
- *Students must obtain at least 50% grade on the final exam to pass the course*
- Non-programmable calculators may be used. Computers, smartphones, tablets, etc. are not allowed

USE OF GENERATIVE ARTIFICIAL INTELLIGENCE (AI)

The use of generative Artificial intelligence (GenAI) tools won't be discouraged in the Faculty of Engineering. As we pride ourselves on building the future we can't hide from the use of GenAI tools to contribute to the understanding of the course materials. You are able to use GenAI tools as follows:

- For any written assignment, except take-home exams, you may use a GenAI tool to help you brainstorm or frame your initial ideas and grammar. However, your final submission must be entirely in your own words and demonstrate your individual experience and insight.

- All GenAI tools used at any point of the course with the intent of helping with homework, assignments or any other assessment content must be disclosed and referenced appropriately.
- GenAI tools use won't be permitted in any type of examination or other assessments where the faculty have prohibited their use. If use of GenAI tools is detected by the instructor in these instances, academic offences penalties might be imposed against the student.
- In accordance with Senate and Faculty Policy, students may be penalized up to 10% of the marks on all assignments, tests and examinations for the improper use of English. Additionally, poorly written work with the exception of final examinations may be returned without grading. If resubmission of the work is permitted, it may be graded with marks deducted for poor English and/or late submission

CONSULTATION HOURS:

- Prof. HaoTian Harvey Shi
- Office Hours: Appointments arranged by email

General Faculty / University Policies

The Faculty of Engineering and Western University have overarching policies that prescribe how undergraduate courses should run. The course-specific policies described above should be considered in addition to those overarching policies, or as course-specific interpretations of them. In the event of contradictions or confusion between course-specific policies above and general Faculty / University policies, please contact your course instructor for clarification.

Western Engineering's undergraduate policies can be found by navigating to:

<https://www.eng.uwo.ca/undergraduate/academic-support-and-accommodations/policies.html>

and then clicking the “Engineering Undergraduate Policies framework” link.

The policy covers:

- Absence/Late Accommodation Policy
- Religious Accommodation
- Academic Integrity
- Academic Offences
- Faculty of Engineering AI Policy
- Accessibility
- Inclusivity, Diversity, and Respect
- Health and Well-being
- Gender-Based and Sexual Violence
