

## MME 4490 - Engineering in a Global Context: Advanced Manufacturing

*Conceived as combination of in-class/out-of-class academic and social activities, the course aims to offer a broader perspective on global manufacturing*

The second edition of the Y4 technical elective (0.5 credit) will run for two weeks in May 2019 in collaboration with **Karlsruhe Institute of Technology** (one of the top three technical universities in Germany) and will include field trips to neighboring companies such as Daimler, Faurecia, Porsche, Bosch, SEW

The course is open for enrollment to Y3 students in **mechanical** and **mechatronics** programs and with permission for Y3 students in other engineering programs

*For more information about this course, please contact:*
